- **APPLICATION:** Very strong bonding, waterproof & weatherproof; it is safe for metal, concrete, marble, tiles, plastic, styrofoam and etc on automotive door & window sealing, trim strip, name plates, address plaques, signs, photo frames, insulation, posters, cushion electronics, power blocks, rubber mat, interior signage, portrait, cover gaps in door and windows, air conditioner hose and a lot of other applications at home & office where you need a secure & stable adhesive.
- **FEATURES:** The double-sided foam adhesive tape is designed to resist curling, making your installation process fast, easy & mess-free, high shear strength, weather proof, oil resistance, anti-corrosion, dust proof, shock absorbing, buffering, sealing , sound proof heat insulation, anti skidding and insulating. It resists extreme temperature, moisture, humidity, UV and so on. No objectionable odor and nontoxic, tasteless, environment protection and no discoloration.
- **INSTALLATION:** This foam tape is easy to be repositioned when it's not fully compressed and repositioning will not influence adhesion durability; it bonds quickly and securely when it's fully compressed. IMPORTANT TO REPOSITION THE FOAM TAPE RIGHT AWAY DURING YOUR APPLICATION, DO NOT COMPRESS IF YOU ARE NOT SURE ABOUT THE POSITION AND ONCE COMPRESSED, THE FOAM IS DIFFICULT TO REMOVE. NO ADHESIVE RESIDUE IF IT'S CLEANED.
- **MATERIAL LAYERS:** The black base layer is foam formed from polyethylene (PE) with double coated Acrylic on both sides with pressure sensitive adhesive. The adhesive is protected by a peel away red liner that can be removed during your application or left in place until the joining surfaces are ready to be attached and it is easy to peel off by hand.
- **LLP-TAPES:** LLPT produces various tapes for industrial & commercial use with ideal sizes & thickness based on the desires of users. LLPT is dedicated to provide high utility on the product with competitive price with great packing protection during transition. Search LLPT-TAPES on Amazon for other tapes like PET Repair Tape, Yellow Woodworking Tape, Blue Thermal Conductive Tape, Aluminum Foil Tape, Black/Gray/Clear Acrylic Tape, Duct Tape & Gaffer Tape.

CCBEC 10A PEAK 25V MAX INPUT SBEC

Product #: 010-0004-00

UPC code:850866000047

Power Management

CC BEC (Battery Eliminator Circuit) is a small device that eliminates the need for a receiver battery. It draws voltage from the motor batteries and drops it to a voltage level that is suitable for your receiver and servos. This is required in applications which use high power servos, where the ESC does not have an internal BEC, or the existing BEC is inadequate.

The CC BEC is designed to operate at up to 6S LiPo with a 10A* peak servo load. Generally used for cars utilizing high powered digital servos. It is also useful in smaller airplanes using 4 standard non-digital servos or 6 micro servos. Perfect for 450 size or smaller helis. If you need more amperage or voltage capability, our CC BEC Pro is the way to go!
